

Minto Group Inc.
180 Kent St #200 Ottawa, ON

POI, in collaboration with partners DIRT and Capital Office Interiors, assembled a dedicated team to work alongside the talented designers at places&spaces. The mission was to craft a workplace that epitomizes choice, variety, equity, comfort, and accessibility.

This project was approached on the belief that a workspace should be a dynamic environment, adaptable to the evolving needs of its users. This dedication to employee well-being not only enhances productivity but also fosters a sense of community and belonging. Through our partnerships and collective expertise, we are proud to deliver a workspace that is not just functional but also inspiring and inclusive.

"Well-being is achieved by ensuring that everyone's needs both mental and physical are met. Our individual work and personal needs shift constantly, day to day and task to task and are influenced by all sorts of variables. We created inviting spaces that bring people together, supporting diverse backgrounds and abilities; promoting health, wellness, and inclusivity; spaces for introspection, meditation, and prayer; spaces to eat, share, collaborate and celebrate. Furniture & accessories/furnishings are an essential part of creating this type of high-performance environment. Getting the right balance of these is the magic."

Susan Brewster, Human-centric Workplace Designer, places&spaces
