

The Challenge

With the 1155 Metcalfe space, Sun Life Financial set out to address a key challenge: redefining the role of the office in a hybrid work environment and creating a space that draws people in – not through mandates, but by design. This 70,000-square-foot space integrates collaborative areas, workstations, lounges, meeting rooms, and cutting-edge technology, creating an environment that meets diverse employee needs. Through a trusted partnership with Sun Life, POI has helped craft a workspace that blends functionality and innovation, inspiring employees to connect and thrive.
